FINEST **DESIGNS** FOR MODERN ARCHITECTURAL

Dimore is an initiative of Qutone ceramics shaped to be an ample architect solution provider with peerless leading-edge ideas incorporated into our products.

Dimore provides much more than beautiful windows and doors. Since 2008, we've been an innovator, going above and beyond to create products that you can be proud to own.

Dimore Windows and Doors is fully committed to providing the highest quality service and products to our customers. Our primary goal is to ensure your satisfaction with our cutting-edge, locally manufactured, superior replacement windows and doors. Our premium products are installed by our in-house installers and project managers who are experienced and licenced. Please browse our extensive selection of aluminium windows and doors, as well as other products. We are proud to offer fair pricing and flexible financing options to ensure that our high-quality products are affordable to all Indians. We offer rust-resistant, corroding, peeling, and chipping-resistant aluminium windows and doors that are designed to last a lifetime.

About Us

DIMORE by Qutone Ceramic is one of the most trustworthy manufacturer, Supplier and installer of Engineering & Architectural system aluminium doors and windows. We are continually pushing the boundaries of technology in order to provide you with a diverse range of world-class and inexpensive windows and doors. DIMORE will leave no stone unturned in making your experience rich, whether it's for your home or business needs. And, as a company, we make every effort to make our operations and interactions as transparent as possible. DIMORE assures that each of its goods undergoes a rigorous manufacturing process, ensuring that you receive a quality product. We also notice that all international and national quality requirements have been met.

Furthermore, our Aluminium products are reinforced in a variety of ways to ensure that they are rigid and long-lasting. As a valued customer, you may be confident that our products will provide you with additional security and safety. It's not only the product; expect our support staff to answer any queries you may have or provide you with any information you require in a timely and humble manner. We are dedicated to combining the engineering of doors and windows with aesthetics and straightforwardly presenting them in our living environment. A gorgeous space, according to DIMORE, can communicate with your thoughts. In terms of products, we consider geography and nature to best balance various window and door performances; we seek the best meeting point for functions and user experience; and we use the most advanced technology and manufacturing processes, from engineering to aesthetics, to integrate products into buildings and create a harmonious relationship between space and nature.

DIMORE's premium window systems allows for a variety of window styles. This, combined with DIMORE's proven reliability, makes it the profile of choice for residential new builds and retro-fit projects. Featuring fixed panes, top opening fanlights and side opening lights, casement windows can be combined to create an almost limitless range of styles, whilst providing the benefit of noise reduction, low maintenance, safety and security and energy efficiency.

Sash Height (Max.)	▶ 3040 mm
Sash Width (Max.)	▶ 1200 mm
Possible Topology	▶ Tilt and turn, Parallel window, Pivot window, Openable window, French window

FIX WINDOW

There are areas of your home that may not need an actual opening window. These areas may be perfect for letting in light or exposing a stunning view. You can have fixed pane windows installed anywhere on the outer envelopes of your house where there is view or natural surroundings. You can even have large fixed panes installed for indoor dividers between rooms. This way, you can make your home feel lighter by using more glass.

SIDE HUNG WINDOW

Side-Hung windows have a hinge on one side and open outwards (casement) or inwards, like a door. This allows maximum ventilation into the home where airflow is desired. Inward opening windows are also effortless to clean on both sides. Its simple design makes the side hung. This easy-to-open design makes casement windows ideal for tough-to-reach places, such as over a kitchen sink or bathtub.

DOUBLE SIDE HUNG ARCH WINDOW

More important than ever these days, homeowners like the fact that double hung windows are energy efficient. The double locking mechanism makes them more tightly sealed and the easy ventilation allows you to let in some fresh air on a nice day and rely less on your home's heating and cooling.

PIVOT WINDOW

A pivot window is essentially an ordinary casement window with another opening mechanism. Here, the casement - the movable part featuring the glazing - is not side-hung on hinges like a door. Our aluminum pivot windows feature an innovative and unique design that allows you to rotate the window sash on a 180° basis either horizontally or vertically from hinges mounted in the centre of the frame. This versatility makes the pivot window ideal for a variety of markets; from residential, education and healthcare to more commercial applications such as office blocks.

TILT & TURN WINDOW

The turn-tilt window has a tilt and turns, two different opening functions. It can be opened fully like a casement window (inwards) or they can be tilted from the bottom so that the top of the window is angled into the room, giving a smaller opening for ventilation. The tilted opening also has the added benefit of increased security and safety as no one can fit through the gap and Turn inward providing a wide opening for emergency egress. Therefore, turn-tilt windows can often be used in multi-story buildings, as a tilted window prevents fall accidents and facilitates cleaning.

PARALLEL (POP-UP) WINDOW

Aluminum parallel windows are a refreshing option for architects and specifiers looking to create impact and maximize performance. Opening along all four sides to a consistent dimension, our parallel window offers the best possible ventilation, with increased performance almost double that of a traditional casement window. Effective ventilation around the whole perimeter of the window - can achieve approximately twice the natural ventilation of an equivalent sized top hung window*

TOP-HUNG WINDOW

Top Hung windows are another standard design targeted for the residential market. The frame is attached to the casement via a hinge on the top side of the casement, which allows the window to swing open outward and can be stopped at a position through high-quality steel friction stays. With the availability in a variety of colors, DimoreTop Hung Windows can be comfortably adapted in hotels, hospitals, and multi-story buildings.

FRENCH WINDOW

If you're looking for a timeless and elegant window that will let natural light stream into your home, then a French window could be a great option. DIMORE's French windows are truly one-of-a-kind. These windows can be single or double opening ones and are hinged at the side. Typically, these windows are provided with a handle on the inside giving you an additional security feature to your home. French windows can be designed and built with a single plain glass section, Georgian bars can give them a more classic appearance.

SINGLE DOOR

Our single doors are frequently installed in storefronts, offices, and apartment buildings. There is also a selection of low thresholds that comply with part of the building regulations for easily disabled access doors. Aluminum door are most environmental friendly in comparison of wooden door. They have long life have no effect of rust, corrosion and termite effect. Clean easily simply by dusting and washing. They have less maintenance cost. Aluminum doors are good choice for commercial building and offices.

FRENCH DOOR

There is a particular image that comes to your mind, whenever you think of French doors. Among other things, what you envision is a large glass pane that is sectioned into several smaller panels to give it a different but elegant look. These smaller panels are usually called as Georgian bars. There is much more to a French door that merely serving as an entry or exit point. In fact, these doors give you an opportunity to allow natural light to pass through your place and add sheer beauty to the whole area!

SEAMLESS CORNER WINDOW

With the corner slider door range from Dimore, you'll be able to turn your little nooks and alcoves into beautiful balconies and exciting garden spaces. These corner slider doors look great in modern rooms and let in as much natural light as possible, making them even more appealing. With no corner mullion, seamless views are achieved, highlighting spectacular vistas at every corner.
